NATURAL SETTING

Pocahontas County owes its early development largely to its
position on the boundary of Virginia. Pioneering explorers discovered
its rich valleys on their first short trips beyond the Allegheny barrier. Later, it became an important gateway for settlers from the
eastern communities who pushed into the free lands of the Ohio country.
The county, in its geographical placement and contour, is quite similar
to West Virginia, itself. Trim the northern panhandle region from a
map of state and the remainder will be surprisingly like a map of
Pocahontas. Like the state, the county extends much farther north,
south, east, and west than its size would indicate. From 37 degrees,
40 minutes north latitude at its southermost point it stretches to
38 degrees 45 minutes north latitude. Similarly it reaches from 79
degrees, 35 minutes to 80 degrees, 24 minutes west longitude.

Its more than 900 square miles of land make Pocanontas the third county of the state in size. It was formed from parts of Bath, Pendleton, and Randolph counties and was originally thought to contain 820 square miles. Boundaries, as determined by the Virginia legislature in 1821, were as follows:

"Beginning at the line of Greenbrier County on top of the Allegheny Mountain Thence with the said line to the head of Spice Run;
thence with the said line to the end of the Droop Mountain, thence with
said line to Fryers Knob, thence with said line to where it intersects
the line of Bath and Randolph, thence with the line dividing Randolph
and Greenbrier Counties, to the mountain opposite the junction of the
Bernock Shoal Run with Williams River, thence a straight line to the
Esuth of the dry fork of Bik River, Thence a straight line to the top
of the sountain between the head of the Valley River, and the point

The straight line from the Slavens road to the mountain opposite the head of East Fork of Greenbrier caused much confusion. As county lines were then, a corridor was formed cutting off a part of Pendleton from the main body of the county. Also, a "no man's land" was created adjacent to Randolph. After considerable dispute the boundaries were soved to the present location. Pocahontas thus gained a vast area of rich timber land. Burner, May, Gertrude and Wildell are lumber towns which apprais up in this formerly disputed territory. About ten miles of the Western Maryland Railrond together with attending operations is is the area. Afew years later the southern border was changed slightly, giving the county its present area of, 602,580 acres. As in the case of most land where rough terrain is general, boundaries wraydetermined largely by natural barriers, streams, and divisions of water shed. The infamiliarity of many an early surveyor with the wild country in which he worked forced him to rely upon prominent landmarks for his basings. However, minde political and social grouping were also influorest greatly by topographical situation it appears legical that the system is far more just than the arbitrarylaying-off of orderly The of townships and countles.

part 1.

Sec A. Pocahontas County is situated on the easternside of the State somewhat below the center of West Virginia, is adjoining the State of Virginia in the east, the meanders of the Alleghany mountains, and the watershed thereof which is the D line between Virginia and West Virginia, forms the eastern boundry line of Pocahontas County except the north end of the County which is bounded on the east by Pendleton

Pocahontas County is bounded on the north and north-west by Webster and
Randolph Counties, on the north-east by Pendleton County, on the east by Highland
and Bath Counties of the State of Virginia, and on the south-west by Greenbrier County

County of West Virginia.

The Geographal position of Pocahontas County, or as it is oriented in the State of West Virginia, in reference to its position of Latitude and Longitudinal departure; at the High-School Baildinguat Greenbank taken as a point as near as can be defined, is 38 degrees, 25 minutes, and 33 seconds of North Latitude, and 19 degrees, 49 minutes, and 30 seconds of Longitude from Greenwich.

The Geographal of Marlinton (the County seat of Pocahontas County) is approximately as taken from the Topographical Maps made by U.S. Engineers for the Geological Surveys, is 38 degrees and 13 minutes of North Latitude, and 80 degrees and 6 minutes of Longitude.

In reference to the Magnetic declination , or the delination of the magnetic compass needle , from the true North Meridian appears to be 4 degrees and 30 minutes of West Declination , with an annual change of 3 minutes per year.

(All the U.S. Government surveys are based on the True North Meridian , all the local and private lands are surveyed by the Magnetic Meridian.)

The County is irregular in outline, and has no definite form, Its greatest maximum length is nearly 60 miles running in a northeast-southwest direction and its greatest width in a northwest and southeast direction is approximately miles narrowing to about 12miles toward the northern end.

The present area of Pocahontas County, as determined with planimeter from the topographic sheets of the United State Geological Survey as follows:

Greenbank District ---- 319.24 Square Miles.

Hantersville District ---- 193.64 Square Miles.

Edray District---- 237.05 Square Miles.

Little Levels District --- 192.68 Square Miles.

Total----- .942.61 Square Miles . or about 602.880 more or less

Pochbatias County was formed by an act of the Virginia Legikature in Dec-

It was formed from parts of Bath, Pendleton, and Randolph Counties, and that time was supposed to contain 820 square miles.

The boundry lines of Pocahontas County as origionally established by the Mirginia Legislature in December 1821 are as follows.

Descripting at the line of Greenbrier County on top of the Allegheny Mountain
Thence with the said line to the head of Spice Run, thence with the said line to the
and of the Droop Mountain, thence with said line to Fryers Knob, thence with said line
to where it intersects the line of Bath and Randolph, thence with the line dividing
the junction of the
multime River, thence a straight line to the mountain opposite, Bannock Shoal Run with
Thence a straight line to the top of the mountainbetween the head of the Valley River,
that the point last aforesaid, where the road leading from Clever Lick to Randolph
Countbouse, crosses said mountain, thence a straight line to where the line of
Pendleton Causty intersects the line of Bath and Randolph Counties on top of the

-between Cheat and Greenbrier Rivers, thence with the top of said mountain to where the road leading from Slavens to Raddolph Court house crosses it, thence a where the top of the top of the Alleghany Mountain opposite the head of the east staight line to the top of the Alleghany Mountain opposite the head of the east fork of the Greenbrier River, thence with the top of the said mountain to the pendleton line, thence with the top of the said mountain to the beginning.

) See" Dyers Index of the land grants of West Virginia for the above calls)

It appears that the establishment of the straight line from the point in the

road leading from Slaven,s to the Randolph County Court house to the top of the

road leading from Slaven,s to the Randolph County Court house to the top of the

Alleghamy Mountain opposite the head of the East Fork of the Greenbrier River

in later years,led to much misunderstanding, and controversy between the Counties

from Harrison County

Pocahontas and Randolph. Randolph County was formed by an Act of the Wirginia

Assembly in October 1786, and did, nt include the head waters of the west Fork

of the Greenbrier River; and it appeared that the said line would would cut a

part of Pendleton in two parts not joining. Pendleton County line as established

by the Wirginia Assembly in December 1787, only called for the top of the Alleghamy

and along the same, and the east side of the Greenbrier waters to the south-west

fountain of the South Branch, this point was the corner of Augusta County at that

time and later formed the setting of the Bath County line as formed from Augusta

County in 1791

After the formation of Pocahontas County in 1821, the greater portion of the area drained by the waters of the West Fork of the Greenbrier River was not completely included in the County lines above mentioned and therefore appeared to be "No Mane Land" and was all due to the fact that the originnal calls show a misunderstanding on the part of the drafteman of the bill, as to the topographical situation of the country.

It was agreed toward understood by the Officials of Pocahontas and Randelph Counties that a definite line must be established between the two Counties at this particular point of controversy.

The service of B.M. Yeager a qualified land surveyor was secured to survey and establish a line as directed by a board of commissioners; The survey notes of B.M. Yeager bearing date of May 22nd 1876 purports the fact that he began at the top of Back Alleghany, on Shavers Mountain, where the Staunton and Parkersburg Turnpike road crosses the top of said Mountain; (This point had been the most where point or corner of Pocahontas County for a period of 55 years).

There with the top of said montain on the divide between the waters of the Grenbrier River, and the waters of the Shavers Fork of Cheat River, and following the water shed of the Greenbrier waters to a point onthe top of the Alleghany Mountain on the Pendlsto County line.

The whole distance of the new line between Randolph and Pocahontas County is about 27 miles. (The bearings and distanc, s of the courses are omitted at this place)

The following is the Commissioners report of the line, and the same is a matter of record in the County Clerks Office of Pocahontas County West Va.

In Deed Book No 15 at Page 188

We Sherman H. Clark , William G. Overholt, and John C. Price Commissioners on the part of Pocahontas County and,

B.W. Crawford, Micholas Marstiller, and S.D. Strader Commissioners, on bahalf of Randelph County, and B. W. Byrne who was dully chose Umpire by said Commissioners, who were appointed sacording to law, to ascertain and fix that part of the County line between the said Counties about which there has been a controversy between said Counties. Met in the vicinity of said disputed line on the 17th day of Tuguet 1880, and first dully sworn; on hearing evidence and argumant of council. The said Sherman H. Clark, William O. Overholt and lat. Price, and D.W. byrne, a majority of said board of Commissioners, ascertain add fix the line in controversy as follows, as shown in the plat accompaning this report

- to wit beginning on the top of Back Alleghany ,onSohavers Mountain ,where the Staunton and Parkersburg Turnpike road crosses the top of said Mountain and running thence with the top of said Mountain on the divide, between the waters of Greenbrier River and the waters of Shavers Fork of Cheat River as follows.

(the first call of the line) S.33 E. 58 poles . _____ (The bearings and distances of the courses of the line are ommitted at this place, but can furnish them if necessary ,) (The last call or line) N. 37 E. 70 poles to a Hemlock , Cherry and 2 Beaches on the top of Alleghany Mountain . where the said dividing ridge intersects the said Alleghany Mountain.

The Commissioners on the part of Randolph County dissenting .

Commissioners on the part of Pocahontas County . S.H. Clark.

Wm Overholt

John C. Price

B. W. Byrne. Umpire.

Pocahontas County Clerks Office .

August 24th 1882

The foregoing plat and report of the County line between the Pocahontas and - Randelph Counties was presented in thesOffice and admitted to record .

TEST JOHN J. BEARD CLERK.

The establishment of the disputed line by the Commissioners, which appears to have been controlle by the deciding vote of the Umpire added much valuation to the Greenbank District of Pecahohtas County; The Valuation of many thousand acres of valuable timber fell to Bocahontas County, and many years afterward many different band Saw mills and Luber Towns were established within the disputed area. The Lumber Towns- Burner, May, Gertrude, and Wildell, and other lumber operations on the Western Maryland R milroad were in the area that was ceded to Pocahontas County. These were all large Lumber towns with Churches and Schools, and had all the modern conveniencies, that went to make up a desirable place for the employees, and their families to live, while the mills were in operation. The duration of the mills that operated on the West Fork of the Greenbrier River was from 1900 to about 1920.

About 10 miles of the Western Maryland Railroad is within this disputed area, and adding that amount of valuation of the rolling stock to Pocahontas County.

In the early days of Pocahontas County Agriculture was the chief pursuit of the early settlers. Because travel was difficult and transportation facilities early settlers. Because travel was difficult and transportation facilities were meager, the settlers were compelled to be self- supporting or self- sustaining

The coming of the Greenbrier Division of the Chesapeake and Ohio Railway running through Pocahontas County, and connecting with the Western Maryland Railway at Durbin, and the hard surfaced roads that pass through Pocahontas County, with all its rock based secondary roads, has made ingress and egress, free and facilitative for Sconomic and social science of the business men of the adjoining Counties of West Virginia; The establishment of the County lines have brought about me restriction of trade relations between the Counties that have common lines with Pocabonta County. Highland, and Bath, Counties of the State of Virginia are contguous or border Counties, but trade relations exist between the above named berdering Counties of Virginia, with the same degree of Social Economy.

However, the trade relations between Ebeahontas County and the bordering
Counties of Wirginia are subject to the State laws of each State, and each adjoining
beriering County, in trade relations, observe the civil laws of their neighbor States.

At the present time Pocahonta's County, formes a part of an economical whole, and is economically related to all its adjoining Counties, especially in that part of economics that pertain to and treats of that portion of human activity which is senserned with earning a living and trade relations.

Roscos W. Brown.

The Mountains that divide the waters of the Greenbrier river and the waters of the Deer creek and the Brush run is known as the Little Mountain, which was formerly called Gallaghers Ridge in honor of Charles Gallagher whos patent of 32,000 acres covered the greater part of the ridge, It was later called Brush - ridge" after a man by the name of "Brush" an assignee of Charles Gallagher and is where we get the name of "Brush RUn."

The Little Mowntain extends from from the County road at Cass, at the junction of the Deer Creek and the Greenbrier river, to a point on or near the Staunton and Parkerburg Pike between the Kelly Spring, which is the head of Brush run and at a place known as the "Slab Camp" and the Spring on the Lunsfor d place now owned by James Wilfong, which is the head of Deer Creek.; At this point it connects with the Frank Mountain, and forms a spur of the main Allegheny - Mountain and has an elevation of 3695 feet.

The Frank Mountain and the Buffalo Ridge unite at this point known as the Top Allegheny " and at an elevation of 4 199 feet (This point is also known as the Top Allegheny Battle Field).

The Puffalo Ridge divides the waters of the North Fork of Deer Creek and Deer Creek proper and has an elevation of 4 000 feet.

Lying between the Allegheny Mountains and the Back Allegheny Mountain are a number of ranges of considerable prominence, Beaverlick Mountain enters from Greenbrier County with its extension in Brushy Mountain, North of which are Browns Fountain, Michael Mountain and other small ranges which terminate, in a wide level ralley north of Greenbank This eries (Geologically speaking) of ranges makes one large fold composed of several small folds the back bone of while the Thite Medina quartaits, it rises in a cliff to 3,652, feet

Just East of the Greenbrier river lies a series of even created short ranges apparated by gaps of greater or less depths.

POCAHONTAS COUNTY

and Thomas Ferguson. Thus did Greenbrier Valley men valliantly acquit themselves on this first field of battle
for American Independence. Had not Gov. Dunmore stopped
them at the Ohio, these Virginians would doubtless either
annihilated the Ohio Indians on their own ground or driven
them out of the country.

(This was taken from an article written by A. E. Ewing, of Grand Rapids, Michigan and published in the Pocahontas times October, 1939.)

The following is a note written by Calvin Price, Editor of Times:

spropriate bronze marker with the names of our Indian fighters thereon. Probably someday we will stir ourselves and do this belated honor. There is a rub however, and that is the fact that what now embraces Pochhontas was divided between augusta and Botetourse counties back in the time of the Revolution. Everything north of Swago was considered augusta and below that creek was considered Botetourte - no line having been surveyed until 1785, eight years after the formation of Greenbrier in 1777, as between Harrison and Greenbrier. While the roster of Captain Stuart's has been preserved, so many of the rosters of Augusta county have been lost. Off hand I sould say that our men went out under Capt. Storgs Loffett, and I have never seen a list or his soldiers. The spent most of the summer of 1774 repairing the for at

volants to realt -- --
